

Particular Sciences Ltd

The physical properties of chemicals, foods and materials.

Nanoparticle sizing and characterisation school

14/15th December 2010, Dublin.

A program to be held over a day and a half, covering the characterisation of molecules, nanoparticles and biopolymers using the Zetasizer Nano. It will cover:

- Zeta potential and sub-micron sizing
- Molecular weight determination
- Melting points and trends
- Aggregation, flocculation and coagulation studies
- pH, conductivity and additive titrations of your materials
- Application case studies
- Use of and live measurements on the Zetasizer Nano

The course will be given by Particular Sciences staff and Dr. Mike Kaszuba from Malvern Instruments.

Who should attend

Current, new and prospective Zetasizer Nano users;
Biotechnologists and molecular biologists;
Polymer, Nanoparticle and colloidal chemists.

Cost

€700+VAT.

Book before 1st December to avail of 10% early booking discount.

Academic discounts available
