

# Particle Sizing School

## 9th & 10th September 2009

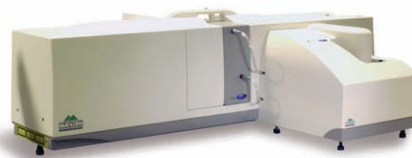

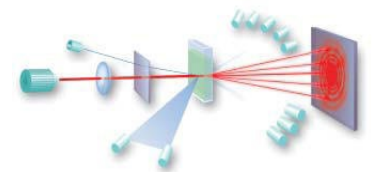

We are pleased to announce a forthcoming Diffraction school for Mastersizer 2000 users to be held in Dublin in September.

This has been a popular and successful course for new customers, for those who require training and certification. It is also for users who need to know the more advanced aspects and is an ideal opportunity for you to discuss particular issues with expert PSL and Malvern personnel.

### General introduction to particle sizing & diffraction technology

(Classroom)

- Instrument design and performance
- Latest software features
- ISO 13320
- Validation
- New Utilities

### Wet dispersion methods

Class and practical /hands on)

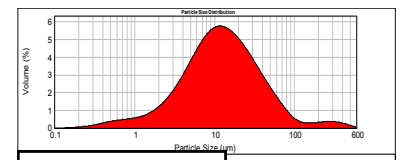

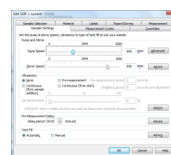

- Wet method development
- Method transfer
- Troubleshooting and user service
- Mie theory optical properties
- Data interpretation

### Dry powder methods

(Class and practical/hands on)

- Dry method development
- Dry method transfer
- Dry method troubleshooting
- Data interpretation
